DOUBLE INTERNATIONAL WORKSHOP

Nowadays contemporary architecture is evolving fast. Does this evolution improve the quality of the space?

Traditionally architecture had the knowledge of comfort. The Spanish Persiana is an instrument inherit from the arab culture. The Japanese Sudare is inherit from the chinese culture. Both systems are still popular and valuable. Looking through modern architecture we can see how these elements are expressed and evolve. The aim of this workshop is to re-find out the value of the Persiana while looking for an evolution and new ways of use and expression. How can these blinds improve Barcelona city blocks? What can we learn form the Japanese Sudare?

This workshop has a second edition that will be held in 2018 at Tokyo and is part of a series of workshops that will connect our architecture traditions with the japanese ones.

2017 BARCELONA

2018 TOKYO

AN INTERPRETATION OF TRADITIONAL TECHNOLOGY

MEDITERRANEAN BLIND

&

JAPANESE SUDARE

dates and venue
