

“Comprimits” are intensive courses about the most used computer tools in the fields of Architecture, Engineering and Building. Its aim is to initiate the student to use the programs of BIM, CAD, 3D, Imaging ... in a short period of time (10 h.), introducing features such as intensification, time flexibility, proximity to ETSAB spaces and high teaching quality. “Comprimits” are coordinated by ARC (Dept. RA-UPC), are open to the whole UPC community (students, teaching staff and PAS) and will be offered in different annual calls.

### **2nd Call July 2020 online**

COORDINATION: ARC - Department of Architectural Representation

MORE INFORMATION: <https://arc.upc.edu>

CONTACT: [olga.guijarro@upc.edu](mailto:olga.guijarro@upc.edu)

The completion of the courses is conditioned to a minimum number of 6 students enrolled by course.

The courses will be taught with student’s personal computer, which will have to install their own software, whether official, educational, rental or free versions.

### **Technical characteristics of the online Comprimits courses:**

The sessions will be online through Google Meet and will be synchronous, with two-way interaction between students and professors.

Students will have to connect with their G Suite profile and UPC address, using just a single connection. A link address to the session will be provided by email, sufficiently in advance. Just remember that names and surnames of G Suite will be visible to the rest of participants.

In the event of any incident (connection, hardware, software ...) the student will be able to communicate with the teacher by mobile phone using the same link address. For this purpose, it is recommended to install the Google Meet application in advance.

The sessions will be 2.5 hours and will not be recorded. Doubts or questions can be done by microphone or chat according professor instructions, always within the session period.

The sessions will not be repeated in any case, but the schedule can be changed with professor authorization, with student's approval and if it's notified in advance.

A certificate of attendance will be provided once the course is completed to students who have attended a minimum of 75% of the sessions, with satisfactory follow-up.

By accessing the sessions, the students give their consent to the UPC for the processing of personal data, as described in the table of basic information on data protection.
