WINTERSCHOOL: INTERDISCIPLINARY APPROACH TO PROMOTE SOCIABILITY IN LIVING ENVIRONMENTS

This winterschool is a two-week programme based in intersectorial studies in different fields: Urban Design, Environmental Sciences, Sociology and Psychology. This intensive workshop is framed in the context of the European Project STUD.IO: Sociability Through Urban Design Innovation, funded by the Strategic Partnerships for Higher Education-KA203 program.

70% of the population currently lives in European cities, where are concentrated more than 75% of jobs at EU level. At the same time, it is always in cities that the most serious social problems occur, such as difficulty in accessing services, housing problems, physical degradation and social and environmental disintegration. Recent reports and surveys conducted on happiness in European city life (Eurostat 2018 and Eurobarometer 419, 2016) show that in Italy, Romania and Slovakia there is an “unhappy” propensity compared to the European average, with differences at a regional and local level depending on the size of population centres. Having Enna and the municipalities in the surroundings as a case study, the winterschool will focus on the elements that affect the city life and the individual sociability (that is: the urban organization and the social policies related to it) to fully understand the social needs, the main conflicts and the strengths of the urban context, both from a theoretical point of view (in the morning sessions) and from a practical point of view (in the afternoons). The course will provide knowledge and skills in the fields of urban and territorial planning, taking into account the sociological and psychological aspects to understand how to plan, design and intervene in living environments.

Eulàlia Gómez-Escoda + Alvaro Clua Uceda, DUOT-ETSAB

On site module (Enna, Sicily) January 15 - 29, 2023 | Online module: to be completed before April 2023.

The organization is responsible for transportation costs (up to €275 per participant) + accommodation and meals (up to €854 per participant).

10 places for students: GArq - Grau en Estudis d’Arquitectura (third to fifth year) ETSAB and ETSAV MArq - Màster Universitari en Arquitectura ETSAB and ETSAV MBArch - Màster Universitari en Estudis Avançats en Arquitectura ETSAB PhD candidates - ETSAB-UPC

4 ECTS (GArq ETSAB students)

applications deadline: November 25 2022
