

2022

Lake Como Summer School

actividad Lake Como Summer School

tema The Lake Como Summer School aims to the development of theoretical and practical tools for the project in an historical context. The topic for the 2022 edition is the requalification of several public open spaces around the Walled City, an area that is strongly characterized by the presence of several important monuments of the Italian Rationalism, among them Novocomum, Casa Giuliani Frigerio and the Monument to the Fallen by Giuseppe Terragni. The activities will consist in a series of lectures, visits in the city, reviews with the teachers of the three schools involved and with several visiting critics. The students, organized in groups (with at least one component from each university), will produce a proposal addressed to three main goals: improve the comfort, increase the attractivity, enhance the cultural heritage.

organización The Lake Como Summer School is organized by Politecnico di Milano - Polo di Mantova in collaboration with the Order of the Architects of the Province of Como, with the support of the City of Como and Fondazione Volta.
