

VIII INTERNATIONAL MBLANDARCH WORKSHOP

LA SALUT STREAM

REDEFINING THE RELATIONSHIP BETWEEN COLLSEROLA NATURE PARK & LLOBREGAT RIVER

activity

The main objective of the workshop is to study the relationship between Collserola Nature Park & Llobregat River and their closest natural and urban environment, according to the term:

CITY- GREEN INFRASTRUCTURE – AGRICULTURE

The workshop will redefine and improve the relationship between the municipality of Sant Feliu del Llobregat and its natural environment following the natural stream of La Salut through the town of Sant Feliu with an integrative design approach, by enhancing and improving: **biodiversity, physical & ecological connectivity, productivity and urban porosity.**

This joint design studio offers a multidisciplinary learning experience in an international workshop between Illinois Architecture & Landscape Architecture and MBLandArch (ETSAB-UPC) in partnership with the Barcelona Metropolitan Area [AMB]. Students will be exposed to a real project and will benefit of feedback and discussions with AMB professionals currently involved in the project, contributing to the making of actual landscape design strategies.
