CITIES' INTELLIGENCE - HACKATHON

Urbanism, once a hard science (or at least it aspired to be) governed by long-term expert plans, is giving way to tactical, agile, temporary, negotiated urbanism that embraces experimentation and data science. It reflects a radically new situation: it's no longer "Urban planning as usual", nor "politics as usual". The city "as usual" is over; new strategies and risks must be taken. While local governments are used to moderate solutions, this shift is daunting and unsettling, often leading to denial.

Our seminar aims to explore this paradigm shift. Cities need intelligence to transform themselves, but this intelligence is first and foremost that of their inhabitants, far from the dystopia of the Smart City where technology was at the helm. Two hackathons will explore two main challenges for urban planning today: the becoming and repurposing of underground spaces, focusing on the CBD of La Défense, near Paris and the strategies in favor of encouraging community engagement in the renovation of rural town development through the La Cité Bahut project in Semur-en-Auxois in France.

ORGANIZACIÓ

Biennale Architettura 2025 / Chaire Ville-Métabolisme (Université PSL) / Pavillon de l'Arsenal / PCA-Stream / SAEMES / Ecofaubourgs

DATES I LLOC

Treball col·laboratiu online en equips de 5 estudiants
(un mes a partir de mitjans d'abril 2025)

Presentació presencial el 24 de maig de 2025 a la Biennale de Venezia, Itàlia

AJUTS

Els participants tindran coberts 2 nits d'hostal, bitllets d'avió i vaixell, i l'entrada a la Biennale

RECONeixEMENT ACADÈMIC

1 ECTS optatiu (GArq)

PLACES

7 places per estudiants ETSAB

matriculats al curs actual de 5è curs del Grau en Estudis d'Arquitectura o Màsters Universitaris de l'àmbit d'Arquitectura

SOL·LICITUDS

finis: **7 d'abril de 2025**
enviar email: **relint.etsab@upc.edu**
assumpte: Biennale _Nom Cognom
indicant: nom | DNI | email | estudis | curs
adjuntar: CV + Portfoli (1-2 pàgines)

relint.etsab@upc.edu

2024-2025 tallers internacionals
