subject BCN: URBAN TISSUES

BCN step by step is a weeklong program comprising several courses addressing specific urban themes. This year summer course will focus on the varied fabrics that shape our town. We will visit several neighbourhoods and discover their urban layout by walking and observing carefully. Reading public space and analysing growing patterns will help us to understand the specificities and detach the identity of different tissues. By using BCN as case study we will be able to apply the obtained knowledge to other places and circumstances.
