

TRACING HARBIN ICE & SNOW FUTURES

2025
INTERNATIONAL
WINTER SCHOOL

HARBIN & THE HIT SNOW STRUCTURE FESTIVAL

“Tracing Harbin · Ice & Snow Futures” links Harbin’s century-old urban fabric with forward-looking innovation:

- Tracing Harbin: fieldwork in historic districts (e.g., Central Street, St. Sophia environs) to explore the interplay of architecture and winter landscapes.
- Ice & Snow Futures: cross-disciplinary studios on construction techniques, cultural IP, and sustainable industry pathways for ice-and-snow economies.

The program adopts a co-teaching + cross-cultural teams + international exhibition model to deepen collaboration between HIT and global partners while showcasing outcomes to academia and industry.

PARTICIPANT UNIVERSITIES

Harbin Institute of Technology (China)

Tsinghua University (China)

Tongji University (China)

Tianjin University (China)
