dirty ecologies

designing anthropocenic humus for the earthbounds

we are going to explore the urban jungle, industrial estate, agricultural land, and nature conservation areas up and down the pit slopes and in the water. by viewing the limestone pits, oil refinery and landfill as an ‘anthropocenic humus’, we ask ourselves: How can we design an integrated and aesthetic meshwork to reclaim the site for all ‘Earthbounds’.

23rd - 30th August 2019 at Hannover - Misburg (Germany)
